The Florida Department of Transportation (FDOT) is holding a public hearing to evaluate the access management modifications on State Road (S.R.) 87. The hearing will allow interested persons an opportunity to view proposed improvements, ask questions, and provide input related to median changes on S.R. 87 at South Lynn Road.

What is Access Management: Access Management refers to the regulation of interchanges, intersections, driveways and median openings to a roadway. Its objectives are to permit access while maintaining roadway safety and mobility through controlling access location, design, spacing and operation. This is particularly important for major roadways intended to provide efficient service to through-traffic movements. It is most evident on freeways, very important on arterials roads, and is also important on minor roadways for safety considerations such as driver sight distance.

Comments may be provided in the following ways: Persons may provide oral statements directly to the court reporter during the hearing, provide comments during the public testimony period, submit written statements at the hearing, or mail them to Brian Pettis, FDOT Project Manager at 1074 Highway 90, Chipley, Florida 32428 or via email brian.pettis@dot.state.fl.us. Comments must be postmarked by November 13, 2017 to become part of the official record.

PROJECT INFORMATION

The intent of this project is to remove the current directional median opening on S.R. 87 at South Lynn Road to provide full access and remove the southbound acceleration lane to accommodate a northbound, left turn lane. The project is anticipated to begin spring 2018 and take approximately three months to complete, weather permitting.
