

U.S. 98 PD&E Study

County Road (C.R.) 30A in Sandestin to West of Phillips Inlet Bridge in Walton County

Financial Project ID. No.: 437179-1-22-01 ETDM No.: 14476

Project Goals

1

Improve safety

2

Improve traffic mobility

3

Provide additional capacity

The Florida Department of Transportation (FDOT) is conducting a Project Development and Environment (PD&E) Study to consider reconstructing portions of U.S. 98 from C.R. 30A to West of Phillips Inlet Bridge.

These improvements consist of widening U.S. 98, intersection improvements and safety improvements. The study will develop and evaluate viable alternatives for these improvements and will make recommendations to address existing and future needs.

What is a PD&E Study?

A PD&E study is the formal process that develops and compares alternatives to determine a preferred action that meets project needs, while minimizing impacts to the social, natural, and physical environments. Engaging the public by sharing and receiving information is a key component of this process and is required by the National Environmental Policy Act.

What can you expect?

Over the next several months, FDOT will collect and analyze data to help compare the project alternatives. A virtual project update and a hybrid public hearing will be held to provide interested persons the most current information on the project and allow an opportunity for input.
